

Technical Rider

Laura Kivistik | Vertical Rope

General Stage Requirements:

- Minimum height from floor to ceiling: 6m
- Minimum floor dimensions: 3m x 3m
- Floor must be covered with a soft carpet or acromat, minimum thickness 3cm.
- Rigging point must be able to support a minimum working load of 850kg, checked by a professional rigger.
- Rigging points must be located on structural supports, such as beams, truss, etc.

Special Requests:

- The installation of rigging must be done by a professional acrobatic rigger.
- The artist reserves the right to communicate directly with the rigger(s).
- The artist can provide rigging themselves for additional cost.
- The rigging structures and equipment must meet all of the safety requirements and ratings listed above.
- The artist reserves the right to be able to inspect the installation and equipment before the performance.

Stage Lighting:

- Appreciated, but not required.
- Sufficient lighting so that performer can see the rope.
- Possibility for a light check with the light technician at the performance space 1 hour prior to the performance.

The Client Must Provide:

- A clean, safe and heated warm up space 2 hours prior to the performance.
- A clean, safe, heated and well lit dressing room with a mirror, bathroom and drinking water 2 hours prior to the performance.
- Possibility for a minimum 20 minute practice in performance space.
- An audio device to play music for the act.

The Artist Will Provide:

- A vertical rope act (length of number is customizable)
- Music (via USB or email)
- Makeup and costume
- Vertical rope (carabiners + swivel, sling if needed)
